Tip for Students – Check Assignment and Test Status

While your students can always check on their course grades by using the My Grades link, if they want to check more detailed feedback about their assignments or tests, they can find that by returning to the Assignment or Test link itself.

Student Instructions – Reviewing an Assignment:

1. Re-click on the View/Complete Assignment link for the assignment (or test) on which you wish to check.

2. You will be told that your assignment or test has been completed and that you should click OK to view the results. Click OK.

3. The Review Assignments screen will show the assignment, the document that you have submitted if applicable, and the grade you have received. (An exclamation mark indicates that the assignment or test has not yet been graded.)
