Creating a Course Homepage

Your instructor may require you to create a home page within your Blackboard course as part of an early “get acquainted” assignment. This is done easily from the “Tools” area of your course.

1. Click on “Tools”, either from the button list or the menu below the buttons. (It could be located either place, depending on your course.)

2. Click on the “Homepage”/Edit your homepage link from the tools screen.

3. Type the homepage information you wish to add to your course into the appropriate boxes as shown and then click “Submit.”

4. To view all the home pages for your course, click on “Course Roster” under the Communications area. Click “Search” to bring up a list of all the students in your course and then click on a name to see a specific student’s homepage.
