Checking Blackboard Grades

You can view your grades for your Blackboard course at any time by visiting the My Grades screen.

1. Click on the “Tools” area, either from the button list or the “Tools” box.

2. Click on the “My Grades” link within the Tools area.

3. Your “View Grades” screen will show all your assignments and possible grades for this course, their Due Dates, when they were Last Submitted, Modified, or Graded, the Grade you received, the Points Possible, and any Comments your instructor has left for you in the Grade Center.

(see the next page for ways to access further instructor feedback!)
In addition to your grade, you can find additional feedback from your instructor in 2 ways:

4. Any short comments from your instructor will appear in the “Comments” column.
   (see right)

5. If your grade is blue and underlined, that means that your instructor has attached more details comments and feedback for you. Click the underlined grade to go to the Feedback Screen for that assignment. *(Note: this is the same screen you would see if you clicked on an Upload/Complete assignment link in your course once your work has been graded.)*

6. The image below shows a sample Feedback Screen. If your instructor has uploaded a feedback document for you, that link will be shown in the “Feedback from Instructor” area. Click on the underlined document title to view the feedback document.
