While you can always check your course grades by using the My Grades link, you may want to check more detailed feedback about your assignments or tests. You can find that by returning to the Assignment or Test link itself.

Click on the name of the assignment or test that you would like to check. For example, Assignment 1.

When checking an assignment, you will be taken directly to the “Review Submission History” page. As you can see this gives a lot of information about your assignment submission.

If there is a green exclamation next to grade, that means that it has not been graded yet.

If this was a test that you were checking you would get a similar page. Depending on the way your instructor has the test set up you may be able to see the test with your answers and the correct answer.

When you are finished, click “OK” to return to previous page.
